

ALEX is a modular furniture system suitable for modern home interiors. The smaller depth makes it particularly convenient for those with a compact and limited space. The decorative workmanship of the edges give the sofa a distinguished individuality. Combined with contrasting decorative pillows, it allows for a variety of visual decisions.

Construction entirely built by wood panels provides the sofa extreme strength. The separate elements can be attached and detached without the need for instruments. Invisible PVC legs. Special use of only eco safe, water-based glues, no odder! The slipcovers can not be taken off.

Seats made of pocket spring units and highly flexible polyurethane, fixed to the base of the sofa.

Exceptionally flexible and time resistant. Very high level of comfort in a sitting, and especially in laying position. The slipcovers cannot be taken off.

Back cushions made of silicone fiber with an inside nonwoven fabric coverslip. Hidden zippers and ability to remove the slipcovers.
