

PLAY is a modular furniture system suitable for modern urban interiors. The bigger depth makes it particularly comfortable for leaning back. The adjustable back cushion allows you to choose the best position for your body – seated up or leaned. Combined with contrasting decorative pillows, it allows for a variety of visual decisions.

Construction entirely built by wood panels provides the sofa extreme strength. The separate elements can be attached and detached with no need for instruments. Invisible PVC legs. Special use of only eco safe, water-based glues, no odder! Ability to take off the slipcovers.

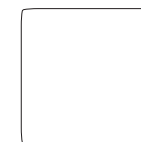

Seat cushions made of 16cm eco friendly mono-block foam individually shaped cushions. Highly flexible and time resistant. Very high level of comfort in a sitting, and especially in laying position. Ability to take off the slipcovers.

Decorative pillows made of silicone fiber with an inside natural cotton coverslip. Hidden zippers and ability to remove the slipcovers.
